## NEARLY 2,000 WOMEN IN SERBIAN ARMY Fight Side by Side With Their Husbands and Brothers.

London—"There were nearly 2,000 women in Serbia's army when I left and more women soldiers were being organized," said Dr. Gruitch, a Serbian army doctor now in London. "The women are not in special battalions. Some of them wear the complete uniform of a soldier for the sake of comfort, while others wear skirts with a blue tunic. The younger women go with their brothers or their husbands. The women are of every class of the population and we cannot prevent them from serving. They inspire men, with whom they march side by side, and with whom they eat and serve shoulder to shoulder in the trenches.

"These women are not afraid," he said. "Nobody in Serbia is afraid and the women in the ranks do not lose their nerve under fire. "We realize the great power of our friends in the war. Every soldier feels that we are only a part of a world army and if it is necessary that our army shall be lost—well, it is only a part. There is yet time to save Serbia but aid cannot come too quickly."

## STAKE AND PRUNE TOMATOES

Habit of Plant May Be So Altered That Patch Is Scarcely Recognizable—Moisture Is Saved.

Are you staking and pruning the tomatoes this year? This is a great scheme, and if you have not tried it, do so on a demonstration scale just for variety's sake.

The tomato plant, in its frantic efforts to reproduce its kind, makes naturally an enormous vine growth with innumerable branches. The result is great green growth, a large litter of little tomatoes, and more shade than is good for best fruit development. Stake a tomato plant and prune it to a single stem, and you change all this; you alter the habit of the plant, so that the tomato patch is scarcely recognizable.

In the first place there are few leaves, only one above each fruit bunch, and this grows so huge that it is never known for a tomato leaf. Then the sun and light reaches every part of the plant and fruit, and the latter hang in clusters and attain larger size than under natural conditions. There are no little tomatoes. There is a considerable economy in space, as the tomato plants stand up straight and slender, and are mostly fruit, and none of the tomatoes have a chance to rot or mildew. Pruning is a quite a job. As a sufficiency of moisture in the soil is what largely controls the fruit yield, the pruning method, by which a much less amount of soil water is consumed than through the more luxuriant green growth of unpruned plants, will be found a great advantage in this respect.

## PAPER POT FOR VEGETABLES

Handy for Keeping Different Varieties of Seeds and Plants—Roots of Plant Undisturbed.

Very convenient little pots for vegetable plants may be made from paper sacks or any tough paper.

Cut a piece eight inches square and fold through the middle diagonally. (Fig. 1). Fold in right hand corner over to left hand edge, like an envelope. (Fig. 2). Then fold the left hand point over in a corresponding manner. (Fig. 3). Separate the

Handy Paper Pots.

points and fold back to make a straight line. (Fig. 4). It now opens in a small box. These may be filled with rich soil and placed side by side, thus keeping different varieties of seeds or plants separate. This also saves buying pots, for when transplanted the paper can be torn off and the roots of the plant remain undisturbed.

**Did It.**  
An old countryman, being congratulated by the rector on the fact that not only son had enlisted, said: "Well, sir; after all, it was only to be expected, for, sure, the old proverb says: 'Train up a child and away he goes!'"

## Primitive Plow.

The most primitive of plows was shaped from the trunks, limbs or roots of trees. Such were in use close to the time of the Christian era. The Old Testament mentions plows of iron or bronze, but except in western Europe and America little progress has been made in the improving of the implement since the time of Herodotus. The first recorded form of plow is found on the monuments of Egypt, where it consists simply of a wooden wedge tipped with iron and fastened to a handle projecting backward and a beam, pulled by men or oxen, and projecting forward.

**Got Light From Butter.**  
Egyptians in the third century used to burn butter in their lamps instead of oil.

A device to be attached in a comb has been invented to permit men to cut their own hair.

Four splendid cloth volumes, full of portraits, sketches, maps, diagrams

Today is the climax of a hundred years of preparation. Read in this timely, authoritative, complete, AND THE ONLY CONDENSED classic world history—of which over 2,000,000 copies have been sold in France alone—just what has taken place in the inner councils of Europe during the past one hundred years. Read in these entrancing pages how Russia has for years craftily been trying to escape from her darkness—to get a year-round open port, with its economic freedom.

Read how Germany and Austria, fearful of the monster's latent strength, have been trying to checkmate her and how they have pinned all in this last, supreme stake.

### The Lesson of the Past

THIS master of the pen shows you the glory that was Greece's and the grandeur that was Rome's. He guides you through the Middle Ages, the picturesque old days of feudalism and the crusades; through the Renaissance up to contemporary history, which Prof. Groenewegen completes in brilliant manner. In the story of the past lie the secrets of today. And you will understand them better when you get the Review of Reviews for a year—for the Review of Reviews will give you a sane interpretation of the events that are taking place with such rapidity.
